Number of samples in this order _____ Sample taken from Stream Lake Estuary Marine

Algae Analysis

- Division
- Genus with Biovolume
- Genus without Biovolume
- Species with Biovolume*
- Species without Biovolume*

Zooplankton Analysis

- Genus with Biomass
- Genus without Biomass
- Species with Biomass*
- Species without Biomass*

Macroinvertebrate Analysis

- Family Level
- Genus Level
- Species Level

* We strive to identify all organisms to species level. However, due to the availability of taxonomic keys, condition of samples, and the density of samples this may not be possible. We will always identify specimens to the "lowest practical level" consistent with customer requests
